

Welcome to the coder forge.

These events hope to provide a place for adults to learn and trade as a `coder`. They are open to all, from complete newbies (noobs) to advanced programmers (guru's). There is no set curriculum and no costs either. Because of this these weekly meetups will be on an open door basis.

As you can see this site is a work in progress, as is the project on a whole, but please do drop into our next [forge](#) and see what it is all about.
